# About Prakriti Honey

Prakriti Organic honey is a pure, nutrient-rich sweetener produced from the nectar of organically grown flowers without synthetic pesticides, herbicides, or GMOs, with bees kept in chemical-free environments and honey extracted without high heat or additives to preserve its enzymes, antioxidants, vitamins, and minerals.

It offers numerous health benefits, including boosting immunity, soothing sore throats and coughs, supporting digestion, providing quick natural energy, and promoting skin health. Environmentally, organic beekeeping supports biodiversity, protects pollinators, and sustains ecosystems. With its rich flavor and versatility, organic honey enhances both sweet and savory dishes.
